April, as we discussed, the site characterization of the bone yard barrels and soil has been completed by EnviroCare and the lab reports have also been collected. JBR/Stantec will forward this information to you in an inventory report by early afternoon today. Clean up estimates have also been prepared by EnviroCare and Emerald Services and Stantec is preparing a cleanup proposal. The proposal was delayed for a site inspection this week by Woody Campbell with DWQ regarding the possible on site storage of bitumen containers. Jon Schulman and I are available for a call with you later this afternoon. Jon will forward the report and then we will follow up with a call to you. Let me know your schedule after 2:00 pm today and Jon and I will call you with the status of the project. Good progress has been made and we are ready to select and implement a plan for removal of the barrels. Thanks Denise
